Undergraduate Career
College of Science Program
Mathematics Major (BA)
Computer Science Emphasis
Requirement Term: Fall 2023

MAIN Campus at TUCSON Location

If you are aspiring to earn a graduate degree or work in computer science, learn how this math degree can position you for in-demand careers. Computer scientists improve lives through the advancement and development of technology. Students earning a Bachelor of Science or Bachelor of Arts in Mathematics with a Computer Science emphasis are immersed in core mathematics coursework, as well as more specialized courses focusing on the logic and concepts underpinning advances in computer science. They are required to complete a minor or second major in Computer Science, as well. This major is a natural lead-in to various graduate programs and careers in everything from mobile app creation and front- and back-end web development to machine learning and data security. Computer scientists are in high demand in both public and private sectors to conceptualize, strategize and build technology solutions.

LEARNING OUTCOMES

- Apply computational methods; Math majors should be able to apply computational methods and mathematical concepts to analyze scientific problems
- Apply mathematical models to current problems; Math majors should be able to critically evaluate and extend selected mathematical models in the current scientific literature.
- Create valid proofs; Students should be able to identify an appropriate proof strategy and almost always able to create a correct proof using multiple strategies as appropriate.
- Define Terms Precisely; Precision is essential in mathematics, and a crucial skill for math majors is to learn to define mathematical terms precisely.
- Effective communication of results; Math majors should be able to effectively communicate results to non-specialized audiences in written and verbal form.
- Recognize valid arguments; Logical rigor is a critical component of mathematical argumentation. We expect math majors to develop the ability to recognize when arguments are valid, and identify logical gaps and flaws.

Undergraduate Graduation Requirements

(RG511)

All course work and requirements for this degree must be completed prior to the date the degree is awarded. The University of Arizona requirements to follow in this audit are required for graduation and awarding of the degree.
